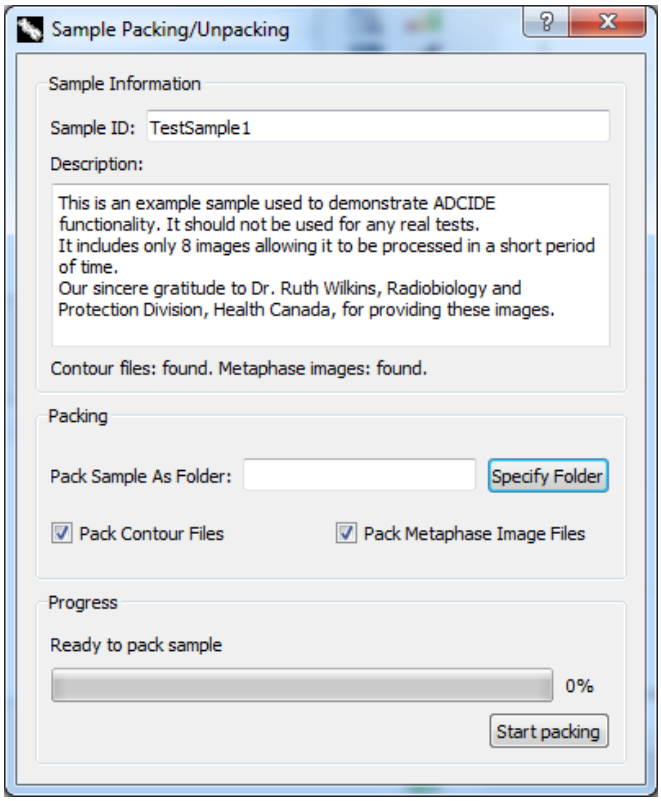
Pack/unpack sample

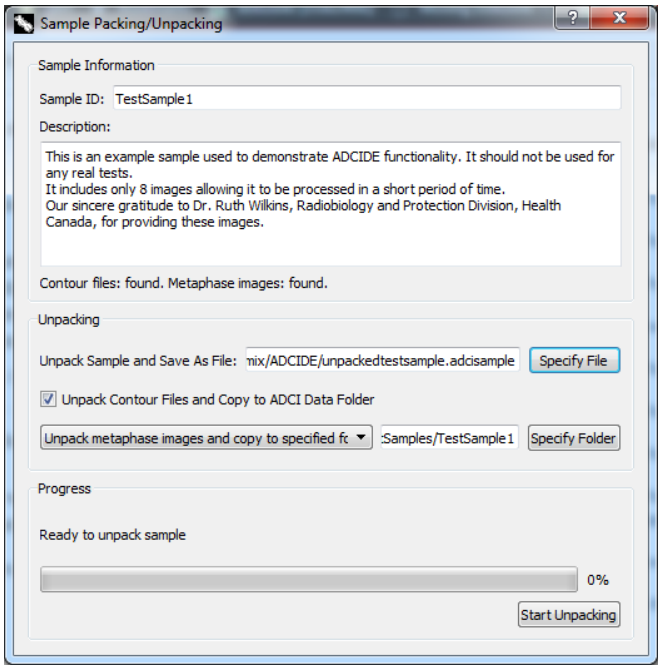
This feature is present in ADCI v1.5 or newer

In the event a sample must be moved from one computer to another, multiple components of the sample must be transferred to the destination computer. Sample packing/unpacking provides functionality to simplify this process.

Pack (export) sample



Unpack (import) sample



Sample Packing/Unpacking
Sample Information
Sample ID: TestSample1
Description:
This is an example sample used to demonstrate ADCIDE functionality. It should not be used for any real tests.
It includes only 8 images allowing it to be processed in a short period of time.
Our sincere gratitude to Dr. Ruth Wilkins, Radiobiology and Protection Division, Health Canada, for providing these images.
Contour files: found. Metaphase images: found.
Unpacking
Unpack Sample and Save As File: nix/ADCIDE/unpackedtestsample.adcisample
Specify File
Unpack Contour Files and Copy to ADCI Data Folder
Unpack metaphase images and copy to specified fc
:Samples/TestSample1
